Koduri Abhiram

LinkedIn: koduri-abhiram/09 Email: abhiramkoduri4004@gmail
Github: Abhiram4004 Mobile: +91-6301236157

Skills

- **Languages**: C++, Java, Python, SQL
- **Frameworks**: TensorFlow, PyTorch, Scikit-Learn, Keras, Pandas, Numpy, Matplotlib, Seaborn,
- **Tools/Platforms**: Jupyter Notebook, Google Colab, MySQL, MongoDB, Docker
- **Soft Skills**: Problem-Solving, Project Management, Adaptability

Internship

- **Edu Tantar Private Limited** | Certificate July 2025 – September 2025
  AI Intern
  - Developed an AI-driven document verification system to classify uploaded documents as Valid or Fake, integrating OCR-based text extraction with real-time machine learning predictions to support digital onboarding workflows
  - Designed and deployed a user-friendly end-to-end solution, handling document upload, automated processing, prediction output, and seamless model integration for business-ready document authentication
  - **Tech Stack:** Python, Machine Learning, OCR (Tesseract), Streamlit, Flask, Scikit-learn, Pandas, NumPy.

Projects

- **AI-driven document verification system** | GitHub February 2025 - April 2025
  - Developed an AI-driven document verification system to classify uploaded documents as Valid or Fake using machine learning models with automated OCR-based text extraction
  - Deployed a user-friendly end-to-end solution featuring real-time prediction, efficient data handling, and seamless integration for digital onboarding workflows
  - **Tech stacks used:** Python · ML · OCR · Streamlit.
- **N-gram Autocomplete System** | GitHub October 2025 – Jan 2025
  - Developed a real-time autocomplete system using hierarchical N-gram language models (trigram, bigram, unigram) with punctuation-aware preprocessing for accurate next-word prediction and partial-word completion
  - Implemented adaptive online learning to personalize predictions by dynamically reinforcing user-generated N-grams, enabling lightweight, interpretable, and low-latency text assistance for web-based applications
  - **Tech stacks used:** Python · NLP · NLTK · Flask.

Training

- **Advanced Data Structures – Center Of Professional Enhancement(LPU) |** GitHub June 2025 – July 2025
  - Completed Advanced Data Structures training, focusing on priority queues, linked lists, and efficient algorithm design
  - Designed & implemented a Print Job Scheduling System using C++ with priority-based job handling and optimized file management
  - Built a modern Streamlit interface enabling job submission, status tracking, and smooth interaction by integrating Python with backend logic.reliability.

Certificates

- Advanced Data Structure by LPU Skills | Certificate July 2025
- freeCodecamp – Responsive Web Desgin Certificate | Certificate Sept 2023

Achievement

- **Code A Hunt | Hackathon:** March 2024
  - Qualified Level 1 in the "Code-A-Hunt" Hackathon Based on technical Evaluation Performance | Certificate

Extra Curricular Activities

- CyberDrill: Cyber Security Workshop | Certificate Feb 2024
- Community Development Project on Farmers Crop Production Management | Certificate July 2024

Education

- **Lovely Professional University** Phagwara, Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.06*** *August 2023 - Present*
- **SR EDU Center** Subedari, Hanamkonda
  Intermediate; ***Percentage: 92.7*** *April 2021 - March 2023*
- **Greenwood High School** Hunte Road, Warangal
  Matriculation; ***Percentage: 78*** *March 2020 -March 2021*
